

BLACK CANYON CITY WATER IMPROVEMENT DISTRICT

623-374-9408

PUBLIC NOTICE

Over the next four (4) to five (5) weeks the District will be replacing all main water lines and service lines on Church Street, David Street, S. Phyllis Street and Albins Street. We will also be replacing all water meters and your customer service valve. In some cases we will need to dig on your property to re-connect to your house service line at the meter box.

This is a very needed upgrade to our water distribution system. It will, however, create some inconveniences. Our project will be followed by Yavapai County's street resurfacing project. During our construction, streets may be closed, at times, (except for local traffic) and water service may be interrupted. We will try not to have water off for more than three (3) hours at any one time.

We apologize for any inconvenience. If you would like daily information, please call the office 623-374-9408 to get information on the scheduled plans for the day.

If any damage is created on your property and not repaired, please call the office so we can look into the matter and forward the complaint to the contractor.
