Subject: Water Conservation, BCC Agua Fria Aquifer Users

Bob Cothorn, President  
Black Canyon City Community Association  
PO Box 33  
Black Canyon City, Arizona 85324

Dear Bob:

It is my understanding that the Community Association Board received my letter dated 1/25/13, addressed from the Chair of the BCC Water District Board. I've heard the letter was discussed at the February meeting of the Community Association. However no response has been forthcoming and no one appeared at our most recent Water District Board meeting (2/21/13) to discuss the requested material.

Availability of water is obviously a Community concern as the District supplies close to 800 families and most of the town's businesses with water. As such one might reasonable expect the Community Association to be committed to aiding any assessment of the community's total annual water demands. Frankly, we are surprised by your Board's excessive delay in responding and the seeming lack of cooperation.

As a member of our community and as the elected representative of approximately 2000 people who live here and use the District's water, I would like the Community Association Board to make time at their next meeting for a short presentation by myself regarding this issue (10-15 minutes should be adequate).

Thank you,

Robert R. Marley  
Board Chair BCCWID
